

# Alien WebQuest Guidelines

---

Take a moment to consider what your opinion about the existence of extra-terrestrial life is. Also consider what your thoughts and opinions are concerning alien involvement in the creation of mankind. Write a brief paragraph here.

Next, get on the internet and find as much credible information as you can that supports your theories, thoughts, or beliefs. Create a word document that summarizes this information. Remember to cite your sources (informal citations are fine in this instance). Remember to evaluate each source and determine how credible it is. If you see any good counterpoints to your theory, list them and find some information that discredits them. This document can be in list format, paragraph format, or random typings. It's up to you.

Later tonight, please write a short, 1-2 page persuasive essay in which you use the information that you have found supporting your theory to convince me to believe you. Essays should be typed, double-spaced, with 1 inch margins, and in a 12 point easily readable font.

Have fun. I look forward to reading these. Upload them to the class website when you are done. No hard copy is required.
