

Requirements for the Final Presentation for the Unit on Creation Mythology

Pick two creation stories. These stories can be ones that we have read for class or ones that you find on the internet.

Create a PowerPoint presentation that gives an overview of the similarities and differences between your two chosen myths. Also highlight some of the more prominent similarities and differences between a couple of other stories that we have read in class.

Take some time and include some images. You can choose to make handouts but keep them to one sheet.

Presentation time should run about 5-10 minutes. Your presentation speech should give a more detailed comparison than what is on your PowerPoint. A good rule of thumb is to write the speech and then create the PowerPoint as if you were taking notes while listening to your speech. You should never read directly off of your slides for the entire presentation.

If you have any questions come and see me.
